## Career Objective

Enthusiastic and dedicated recent graduate with hands-on experience in React and Flutter, seeking an entry-level developer position. Eager to leverage my skills in building dynamic and responsive web and mobile applications to contribute to innovative projects. Passionate about coding and problem-solving, I aim to grow as a developer by working in a collaborative environment where I can apply my knowledge, learn from industry professionals, and deliver high-quality software solutions.

---

## Projects

### React Native Laundry App

A cross-platform app for laundry service management.

React Native: Used for building the cross-platform mobile application.

Firebase: Integrated for authentication and real-time database management.

Redux: Employed for centralized state management across components.

React Navigation: Implemented for smooth and structured navigation within the app

### Job Search App

React Native: Used for building the job search mobile app.

Axios: Integrated for fetching job data from third-party APIs.

Expo: Employed for development and testing.

Custom Hooks & Pagination: Implemented for optimized API data fetching and user-friendly job search with pagination.

### Fitness Tracking App

A React Native app for tracking workouts and fitness progress.

React Native: Used for developing a cross-platform fitness tracking app.

Context API: Implemented for state management across components.

Stack Navigator: Utilized for navigation between screens.

Custom Components: Created for handling workouts, progress tracking, and user interaction.
